

## D2101 SOLAR THERMOMETER

The D2101 is a kind of low energy consumption, high environmental protection, high precision, high stability and long service life. It adopts a recyclable and efficient photocell, which is widely used in food and drug storage display cabinets, freezers and drug and food transportation equipment.

Housing	29.5 x 62 x 11 ABS
Temperature Range:	-40-125C
Display:	LCD 3digits;Height: 12mm
Resolution:	0.1
Update rate:	10s
Accuracy:	±1C@-20C-80C , others:+/-2C
Power:	Solar Power » 90Lux
Sensor Type:	NTC
Sensor Length:	Standard:2.0m( Φ5x25mmxL) (Lcustomization )
Functions:	Display, Measure
Working Temperature:	-20C--60C
Storage Temperature:	-20C--60C
Protection Class:	IP65
Certificiate:	CE
